

ORDER REVOKING TWENTY-SEVENTH CONTINUATION OF STATEWIDE PUBLIC HEALTH ORDER #2: REGARDING LARGE INDOOR EVENTS OF MORE THAN FIVE HUNDRED (500) PEOPLE, WITH EXCEPTIONS

The metrics measuring outbreak progress and healthcare system capacity support the Wyoming Department of Health revoking the Twenty-Seventh Continuation of Statewide Public Health Order #2: Regarding Large Indoor Events of More than Five Hundred (500) People, with Exceptions. This Order specifically revokes the Twenty-Seventh Continuation of Statewide Public Health Order #2, in its entirety, including the restrictions/requirements previously required for large indoor events of more than five hundred (500) people. This Order is in line with the White House unveiling, on April 16, 2020, of certain guidelines for Opening Up America Again - a three-phased approach beginning with State or Regional Gating Criteria and continuing through three phases of removing restrictions when there is no evidence of resurgence of the virus.

This Order is based, in part, on guidance issued by the Centers for Disease Control on May 13, 2021, that fully vaccinated individuals can participate in indoor and outdoor activities without a Face Covering or physical distancing.

This Order is effective on May 21, 2021.

This order is entered under my authority as the State Health Officer. *See* Wyo. Stat. Ann. § 35-1-240(a)(i), (ii), (iii), and (iv).

DATED THIS 21 DAY OF May, 2021.

Alexia Harrist
Wyoming State Health Officer
